BuzzLocker: Rentable Storage Solutions

BUZZ LOCKER

Smart and secure storage solutions, built for sharing.

The BuzzLocker is a cutting edge storage solution that combines James Tobias' high quality and bespoke storage with Becode's innovative security systems.

The BuzzLocker, programmed for rentable storage, is designed for environments where secure storage is offered to customers for a fee. It is best suited for situations where a user may need to store items or luggage for a short period of time (however the length of time a user can access the locker for is dependent entirely on how long they want to), such as at transport stations, hotels, hostels and more. The BuzzLocker is also a great way for monetising your storage and earning you money by utilising your unused space. We even offer a number of financing options to make using the BuzzLocker in this way as simple and affordable as possible.

The self-managing TANmode system utilises QR technology to allow users to choose their BuzzLocker, how long they need to use it and pay for it via PayPal, credit card or phone bill. Users only need to register once and can manage their account simply online. An operator can also manage the BuzzLocker system online to keep track of usage, billing and refunds of excess rental fees. Because it is hosted in the cloud and operated entirely offline, data cannot be manipulated via the internet, maximising both ease of access and security.

Bespoke

We can build a complete solution, from the technology to the style of locker through to the unique finish, tailoring every element to your specific needs.
Offline operation

Operating offline with all data hosted securely in the cloud makes the BuzzLocker immune to hacking and manipulation.

Wireless

No hassle installation as the BuzzLocker is completely wireless, removing the need for a complicated IT system behind it to work.

Simple to use

The BuzzLocker is simple for both you and your users. Keyless operation through a unique code and keypad interface removes the need to monitor and replace lost keys.

Long life battery

A powerful battery provides over 10,000 hours of constant use and allows you to place your BuzzLockers wherever you wish, free from the need of an electricity source.

TANmode technology

Innovative technology cuts out the middle man through automatic key code generation and distribution to the end user, meaning you don't have to.

Reporting

Quick access reports allow you to monitor use of your BuzzLockers.
Securely stored data

The TANmode technology stores all user data safely in the cloud so you don't have to and allows users to use your BuzzLockers again and again without re-registering.

Multiple applications

The BuzzLocker is a versatile solution with the ability to be used for multiple purposes and in numerous environments.
HOW IT WORKS

A USER SCANS A QR CODE ON THE BUZZLOCKER THEY WISH TO USE

THEY SELECT HOW LONG THEY REQUIRE ACCESS TO THE LOCKER, THEN PAY SECURELY VIA PAYPAL, CREDIT CARD OR PHONE BILL

THE USER RECEIVES AN ACCESS CODE DIRECT TO THEIR DEVICE AND CAN MANAGE THEIR ACCOUNT AND BUZZLOCKER RENTAL ONLINE

ADMIN CAN MONITOR BUZZLOCKER USAGE AND BILLING ONLINE

The Lockers Themselves

Our locker solutions are practical and functional, but they're also 'stand out' in terms of quality and style. The BuzzLocker can be built bespoke for your space around your specific requirements so you can choose from any of our locker styles with infinite opportunities to tailor the finish.
