STORAGEWALL

STORAGEWALL

Our StorageWall maximises your storage capabilities and minimises the loss of premium floor space, whilst creating a flexible, modern working environment. StorageWall will generate between 23%-56% more storage capacity than equivalent free-standing units. Surveyed, designed and manufactured to suit your specific requirements, ensuring a tailored fit.

- Various styles and configurations enables StorageWall to be versatile to requirements and preferences.
- Design-led, all StorageWall units are available in a diverse range of finishes with the option for graphics.
- High quality components ensure longevity and durability.
- Superior strength to weight ratio, using our flagship, aluminium structured carcass.
- Toolless operation to reconfigure internal fittings, giving added flexibility.
- StorageWall is fully demountable and relocatable without any loss of quality.

JAMES TOBIAS' QUALITY

We use our own unique aluminium extrusion to create a superior structure to our competitors' standard, timber systems.

The unique design and superior strength to weight ratio mean that they can support up to 240kg weight loading per module and will last significantly longer than their timber counterparts.

The specially designed, high quality shelf clips don't cause damage to fixing holes. This means that our systems are fully demountable so can be taken down and reassembled in a different location without any loss of quality.

What's more, all of our systems are manufactured in-house, ensuring the utmost quality and avoiding a waiting time on materials.

QUEBIX

QUEBIX

Quebix is a stackable storage and display solution, easily configured to fit where and how it is needed. With a huge range of standard and special finishes to choose from you can make Quebix unique to your space. Individual boxes can be bought and configured by you to accommodate storage essentials.

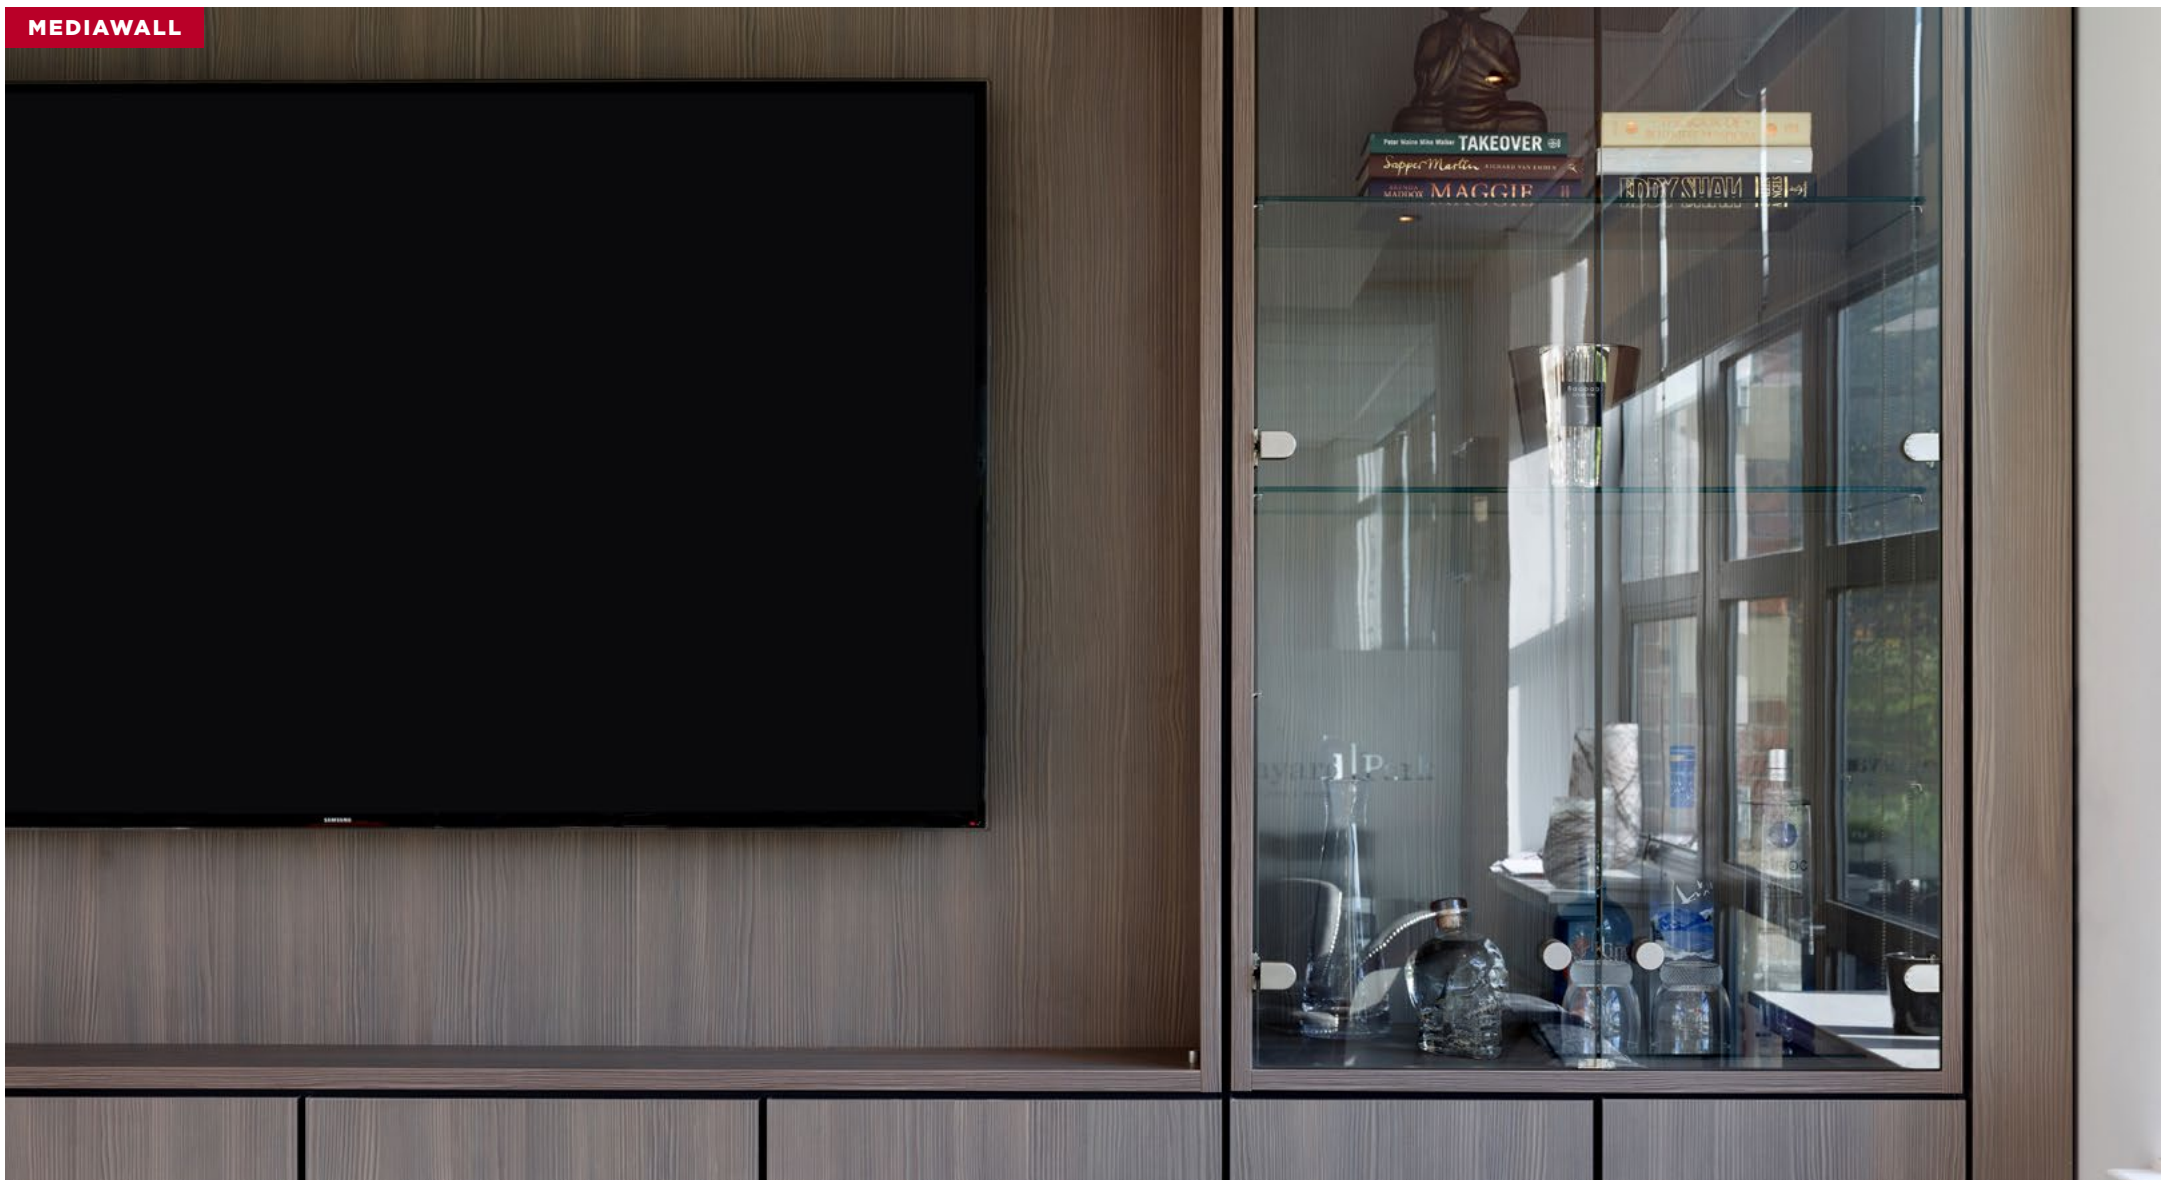

ZONIX

ZONIX

Zonix is an aluminium constructed zonal display product, perfect for all environments. They can be supplied in either 19mm tube or 25mm box section allowing you to tailor the design and function to your desired taste.

The frames and connectors come finished in black as standard, but the bars can be painted from our standard RAL finishes. The shelves, boxes and internals are available in our standard MFC finishes.

MEDIAWALL

MEDIAWALL

Our MediaWall is designed to showcase your fully functional media centre, suited to any associated environment. Able to house a multitude of high tech media equipment, MediaWall combines James Tobias' ethos of maximising capacity and minimising floor space requirements.

MediaWall can be used in many places – from the office to the boardroom, conference and training, breakout rooms – the possibilities are almost endless.

EDUCATIONWALL

EDUCATIONWALL

EducationWall is a run of modular storage units to house all the key elements of the modern classroom, such as SMART Interactive Whiteboards, Gratnell trays, charging points for tablets/laptops and lockers. All of the key items can be incorporated to make one complete attractive, user-friendly, multi-purpose storage system.

- Maximises valuable classroom space.
- Acts as an inspirational focal point in a prime location providing space for display work and key learning points.
- Saves money by taking all current individual products and merging them into one run.
- Improves performance, giving pupils added enthusiasm in the classroom.
- Provides a wow factor – a unique tidy solution that fits in with the current trends and demands of a busy classroom.

LIBRARY

LIBRARY

Our library units allow you to showcase your collection of books and literature.

It can have the same design features and characteristics as all the product range, enabling seamless integration. With superior weight loadings and high quality material, the library system will work in many environments.

BUZZLOCKER

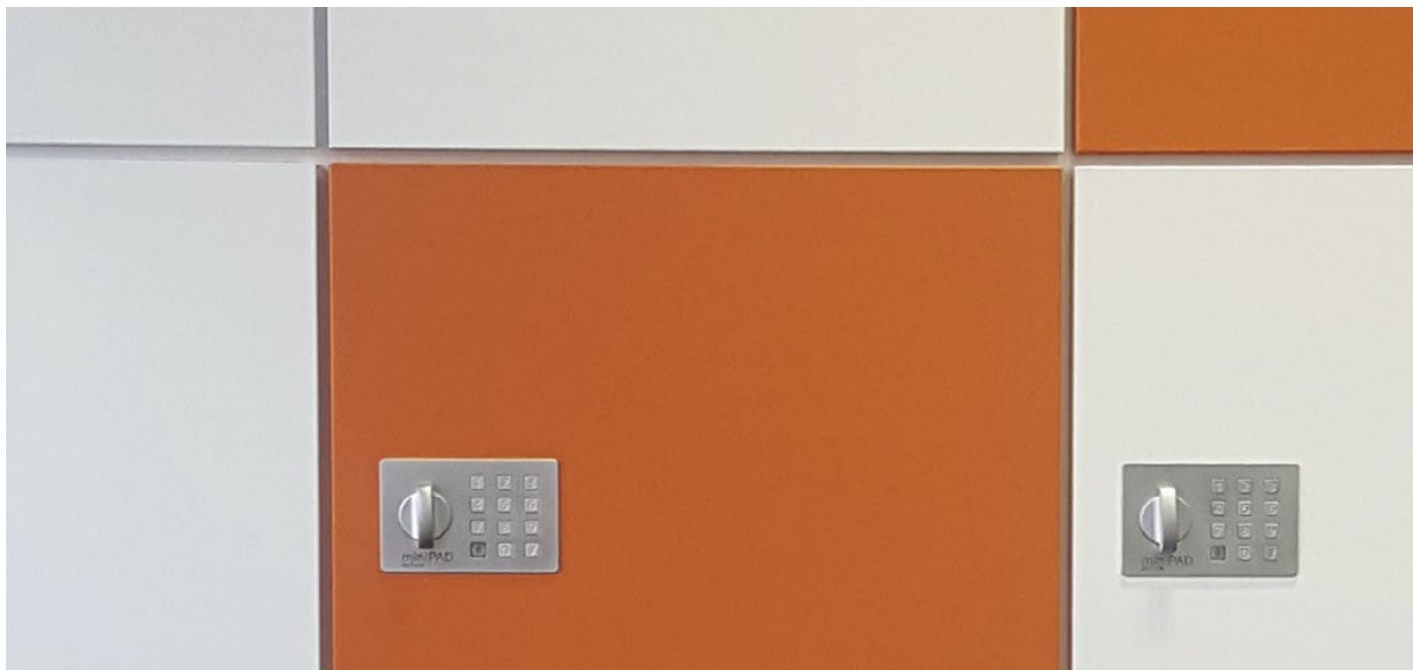

BUZZLOCKER

BUZZLOCKER

The BuzzLocker combines James Tobias' high quality and bespoke storage with advanced innovative security systems.

Whenever and wherever your customers or employees may need to store and exchange documents, materials or personal belongings, BuzzLocker takes care of everything for you. The intelligent TANmode technology securely hosts user data and generates random locking codes that it deploys to the end user via SMS or email, allowing them direct access when they need it and where.

LOCKERS

LOCKERS

No longer just a functional solution for the modern office, we've developed and designed locker systems that will bring your workspace into the 21st century.

All of our storage systems can be personalised with durable, laminate-protected graphics that maximise opportunities for corporate branding or add a decorative element to any space.

Our range of locks and handles, from high tech, wireless solutions to traditional key operated locks, combines secure functionality with elegant design.

ARIA LOCKERS

Practical and beautiful, you'll love Aria's clean lines and space-saving features.

The aluminium system gives long-lasting structural integrity while the full height design offers an aesthetic that can be tailored to suit your business style or brand.

And it can all be fully integrated into existing runs of James Tobias StorageWall.

FAST LOCKERS

Our Fast Lockers are multipurpose, free-standing units with recessed plinth detail. Flush Locks come as standard on our Fast Lockers but other locks and accessories are customisable to suit your business or work space.

Our Fast Lockers are a standard size of 400mm wide, with variation in the number of lockers that can be stacked into a system. Whatever the combination of lockers you are looking for, Fast Lockers give you a standard, off-the-shelf option for quick, safe storage with the reassurance of James Tobias quality.

Z LOCKERS

This hybrid system can be fully integrated into all James Tobias systems to create a complete storage solution that is also streamlined and stylish.

We can tailor the solution to accommodate hanging garments and wider items, all while using the minimum amount of floor space.

The all-timber internal construction offers sustainable quality, flexible hinge positioning and adjustment.

TRIM LOCKERS

Designed to maximise space in the most flexible way, Trim's free-standing units with recessed plinth detail create a clean, clutter-free profile.

Add a practically unlimited choice of finishes and colours, and you've got everything you need to create a truly bespoke space that is also infinitely practical.

RETREAT

RETREAT

Our Retreat is a customisable addition to any workplace, instantly creating a private meeting or workspace where none existed previously. They are a functional, flexible meeting space allowing for people to get together in a creative space.

We offer a large amount of customisable features including sustainable products, interior lighting, charging options, Bluetooth speakers and much more. There are also a vast range of finishes which allow a fully branded, creative space, from fabric finishes, to graphic wraps.

COSY COVE

COSY COVE

Ideal for modern offices, our Cosy Cove allows staff the flexibility to meet, work and collaborate in a creative environment which is worlds away from a stuffy boardroom.

Finished with premium fabric in a range of colours, the Cosy Cove is the perfect addition to a creative workspace and a fantastic way to liven up traditional 'corporate' ones. Better still, it can be incorporated into any run, allowing you to create an entirely bespoke working environment.

TEA POINT

TEA POINT

Completely bespoke, made for any space yet easy to fit, our Tea Point offers all the storage and functionality you need to make tea breaks easy, convenient and hygienic. Quick to manufacture and install in the finish of your choice, it can neatly store all your accessories and appliances. You'll wonder how you ever managed without one.

Benefits of Tea Point include:

- We install the Tea Point (you only need to plumb in).
- Competitive price.
- Vast range of finishes.
- Manufactured in the UK.

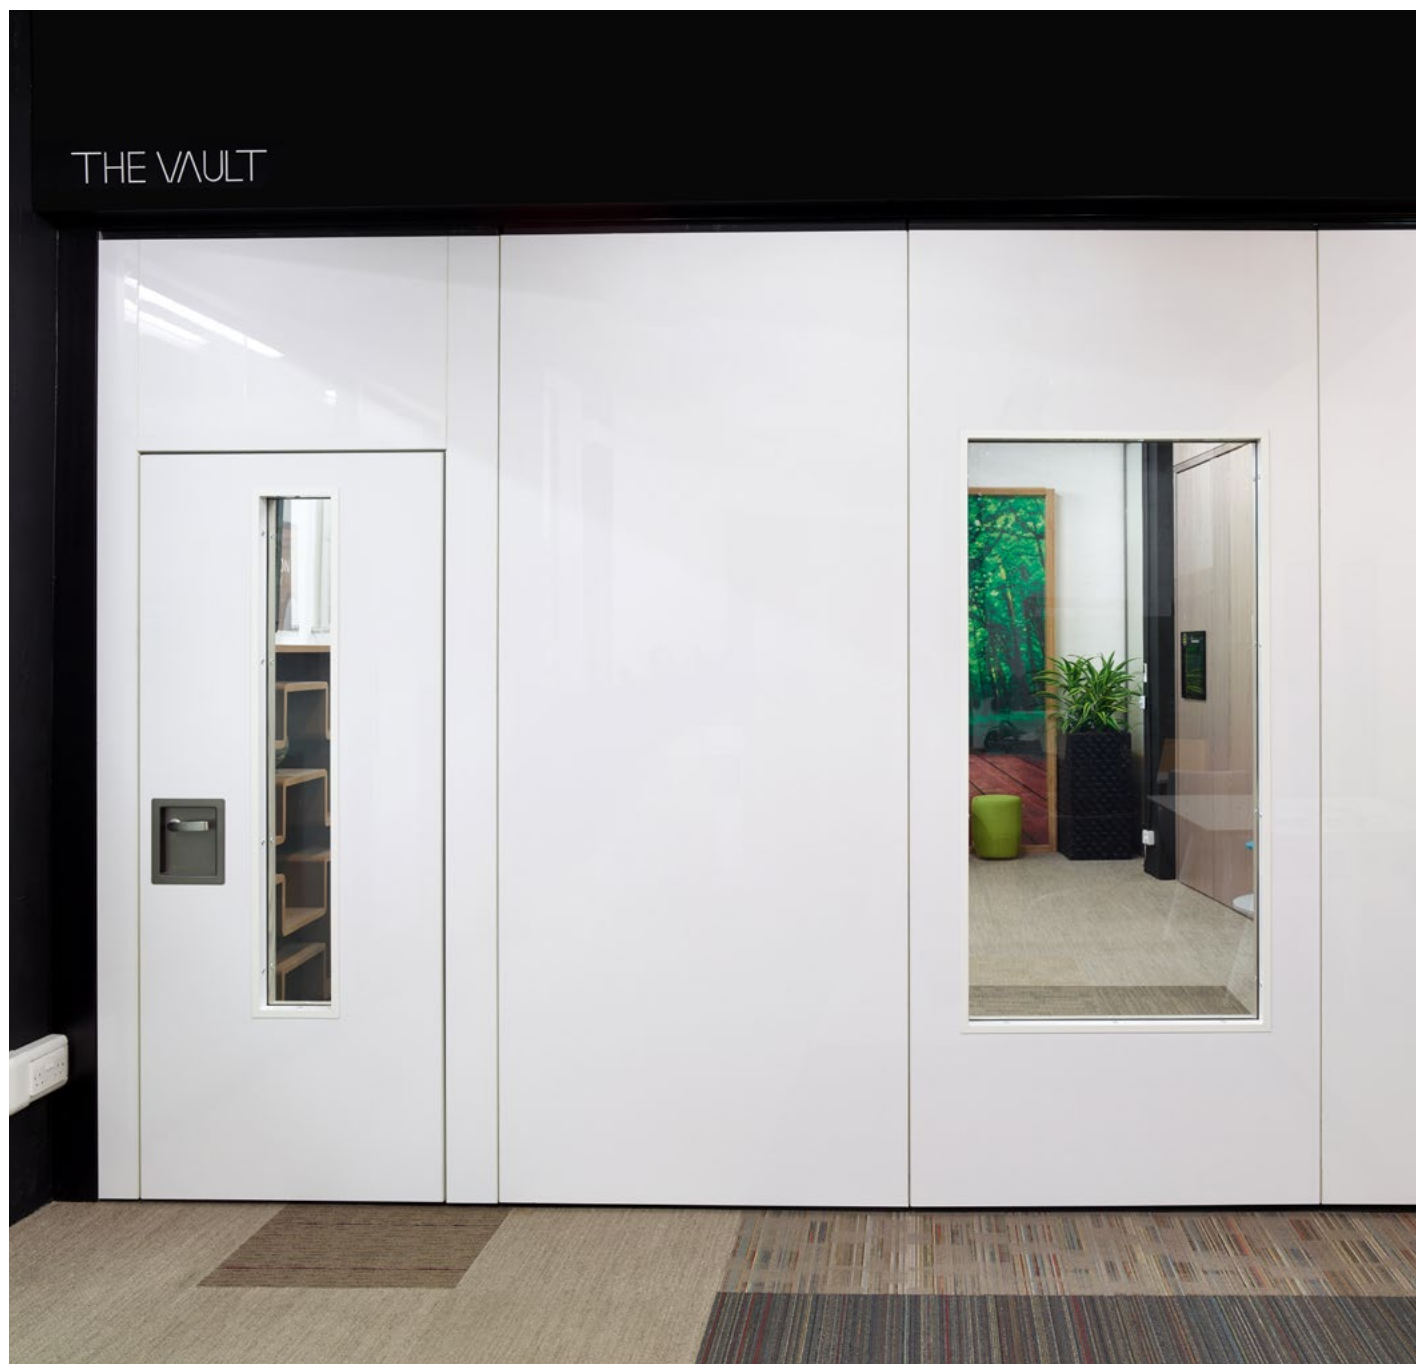

DIVIDE

DIVIDE

With flexibility of space becoming more important, the addition of movable walls and sliding folding partitions is an ideal way of utilising existing space efficiently, effectively and economically.

Whether you want to sub-divide a classroom or office, host more than one function in a room simultaneously or create a number of rooms from one large floor space, we have a solution to suit all requirements and budgets.

DIVIDE AIR - INDIVIDUAL MOVEABLE PANEL SYSTEM

The Air range is an individual panel partition system offering an acoustic insulation rating of up to 59dB Rw. Ideally suited for high specification applications due to the sheer flexibility, numerous stacking arrangements available and its impressive acoustic qualities.

DIVIDE INFINITY - CONTINUOUSLY HINGED SYSTEM

The Infinity range is a continuously hinged system. For added flexibility, or when there is no suitable structure to suspend from, the Infinity can be supplied as a bottom rolling option, running along a low profile floor track.

FINISHING TOUCHES

STANDARD FINISHES

Our standard finishes are made from durable MFC. The finished result is a beautiful, quality product without a price tag that breaks the bank.

The possibilities are endless as we offer an extensive range of finishes across a variety of woods through to soft pastels and bright, bold colours. You'll be sure to find just what you're looking for.

Woodgrain finishes

Element

Elite

Pastel

Other finishes – a wide range of colours are available on request

WOOD VENEERS & LAMINATES

We've put together a range of wood veneers and laminates chosen for their quality and durability as much as their aesthetics.

So you can be sure that, whatever your preferences, you're always choosing both practicality and style.

GRAPHICS

Make your StorageWall system truly your own with great looking, long lasting graphics. Much more than a decorative finish, we've developed our graphics to be protective and offer long term durability.

So if you want a long lasting, striking finish, while making a real statement we'll bring your ideas to life.

SPECIAL FINISHES

SPECIAL FINISHES

Recognising the importance of sound management in the work place, our Acoustic board for StorageWall absorbs sound, reducing noise reverberations. Our pin boards are a staple for any functioning work space, whilst our dry wipe surfaces enable ideas sharing and displaying key information. Adding a creative twist, decorative sculptured panels can be created in a range of finishes with a bespoke, CNC routed design that is infinitely impactful.

It's easy to incorporate any of our special finishes into your complete design scheme and our designers can help guide you or create a design from your brief.

TRACK FINISHES

TRACK FINISHES

A wide selection of colours for our internal tracks are available to seamlessly blend them with the rest of your storage solution.

LOCKS & HANDLES

LOCKS & HANDLES

Safe and secure.

Our range of locks and handles, from high tech, wireless solutions to traditional key operated systems, combine secure functionality with elegant design.

We're always growing and innovating and our range of locks and handles reflects this. Incorporating this kind of innovation is what we do, so you can expect truly secure storage solutions that are also easy to use – and that your people will love.

Whether you want a traditional solution or something space age, something that stands out or that blends in, the choice is yours.
