

Trim Lockers specification

James Tobias **Trim Lockers** share the same dna as the Fast Lockers range, but features additional size and colour options.

This versatile, free-standing storage system includes recessed plinth detail and is designed to maximize space in the most flexible way.

CONSTRUCTION

Carcass: 18mm white (EW) mfc as standard

Hinges: 110° concealed hinge as standard

Locks: Flush lock as standard (other locks available on request)

Finishes: Choose the internal and external finish of units from our standard range of mfc. Alternative finishes are available on request.

SIZES & STYLES

Width: 300mm, 400mm and 500mm (crs)

Height: Multiple compartments up to 2,700mm high.

James Tobias recommend a maximum locker compartment height of 2,200mm, with the remainder allocated for general storage.

Note: All door sizes are uniform and consistent in size.

Depth: 412mm, 472mm and 600mm

ACCESSORIES

An extensive range of paper slots, label frames, number discs, power charging solutions and graphics are available on request.

FINISHES

From our standard range of mfc finishes (other finishes available on request)
