

## Z Lockers specification

James Tobias **Z Lockers** share the same robust design and rigorous construction methods as our other locker and storage ranges.

Z Lockers provide personal storage, tailored to accommodate hanging garments and wider items, while using a minimum amount of valuable floor space. Height adjustable and with options for additional storage, James Tobias Z Lockers system integrates seamlessly in any space.

### CONSTRUCTION

**Carcass:** 18mm light grey (ELG) mfc as standard

**Hinges:** 110° concealed hinge as standard

**Locks:** Flush lock as standard (other locks available on request)

**Finishes:** Internal finish light grey (ELG).

Choose the external finish from our standard range of mfc.

Alternative finishes are available on request.

### SIZES & STYLES

**Width:** 300mm and 400mm (crs)

**Height:** Built to ceiling to a maximum 2,800mm high. .

James Tobias recommend a maximum locker compartment height of 2,200mm, with the remainder allocated for general storage.

Note: All door sizes are uniform and consistent in size.

**Depth:** 412mm, 472mm and 600mm
