

Retreat specification

Functional and flexible, James Tobias **Retreat** instantly creates private meeting or workspace where none existed previously.

Retreat is a customisable addition to any workplace, allowing small numbers of people to meet in a creative space. The design includes subtle features that enhance the look and quality of the build.

The outer frame has a 100mm surround for housing cable routes and additional sound absorbing material if required. The surround also gives depth and a robust appearance to the design. Recessed upholstery minimises the protrusion internally, but keeps the appearance modest and welcoming. A featured continuous shadow gap, between cushion and shell, gives our retreats a subtle design identity.

CONSTRUCTION

- Frame:** 30mm, welded and bolted, modular steel frame
- Outer shell:** 18mm mfc (other substrates are available) clips into the steel frame
Toolless operation allows changing of the façade if required
- Inner shell:** A combination of 18mm mfc and upholstered panels, all clipped onto steel frame
- Table:** Power coated pedestal leg frame and mfc top (matching the façade)
- Upholstery:** 50/75mm firm foam fabric wrapped in Camira fabric
Other materials (including Kvadrat) available on request
- Lighting:** Ceiling pendent or l.e.d spotlights as standard. Controlled via switch or p.i.r
- Power:** As standard our retreats come with one UK 3-pin plug socket and twin, fast charge USB

FINISHES

All Retreats are available in colours from our standard range of mfc and fabric finishes.

The steel/Zintec frames are powder coated in a RAL finish from our standard range.

Other finishes available on request.
